

I drive extensively and listen to satellite radio most of the time. Satellite radio provides me with the variety and quality that are not available elsewhere. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I respectfully urge that the FCC reject the NAB's petition 04-160 and support XM's ability to provide the kind of programming that I demand and deserve. The quality of standard radio available in most parts of the country is poor. XM Satellite provides a better product, why punish this unique medium because the broadcasters won't step up to the plate and improve their product. Respectfully, I urge you to reject the NAB's petition 04-160 and support satellite radio's first amendment rights.
